

# Troodie

AI-powered social commerce for restaurant sales attribution

Kouame N'Dri, CTO  
kouame@troodieapp.com

# \$80B spend but 1 in 3 restaurants won't survive their first year

Diner behavior has shifted

Lack of data and tools

Pay up, or get left behind

Status quo is broken

Flying blind on ROI

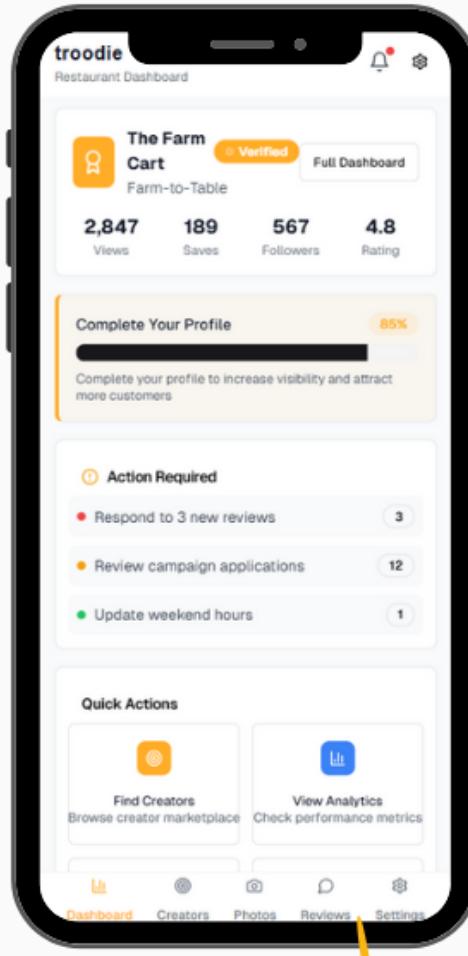

**Lack of data is costing them their business**

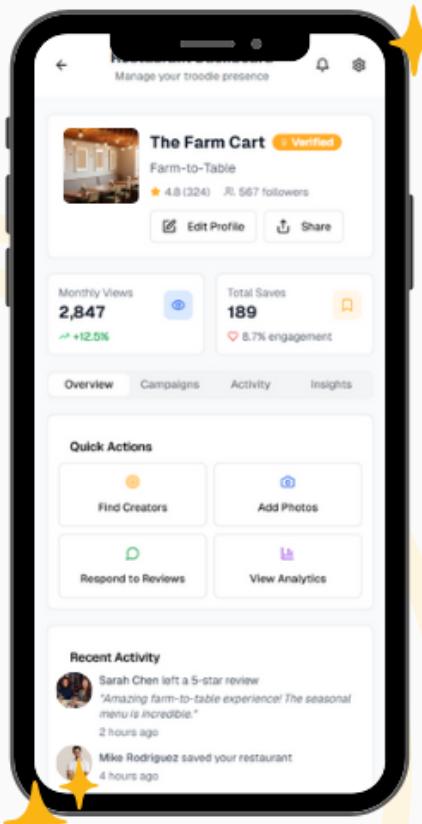

# AI social commerce platform connecting content to sales

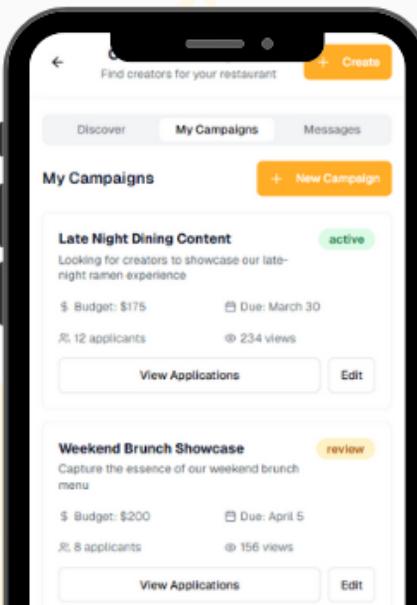

## AI Campaign Manager

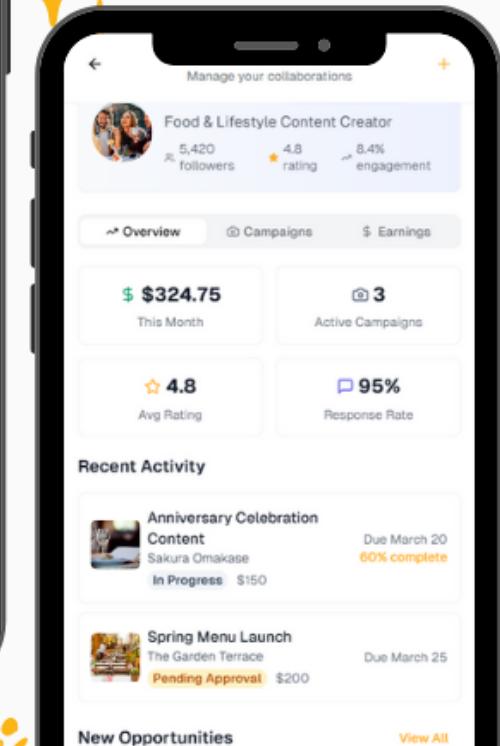

## Sales Attribution Engine

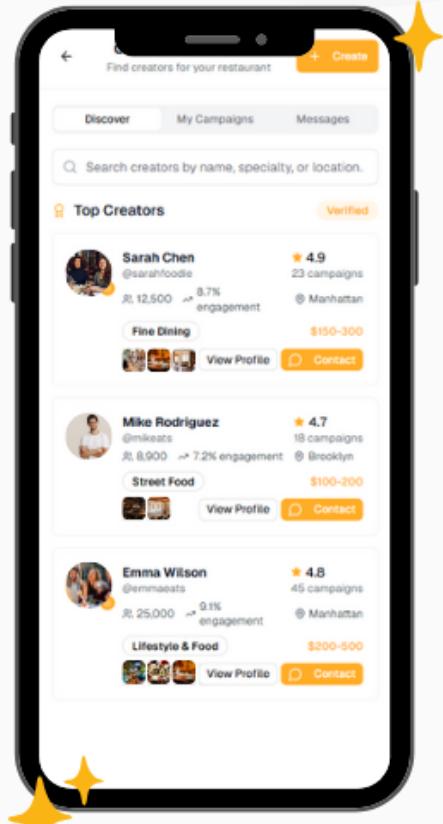

## Personalization Algorithm

## First-Party Diner Data

## Creator Marketplace

Troodie is the first social commerce platform to connect creator content to real sales—empowering restaurants to own their marketing outcomes

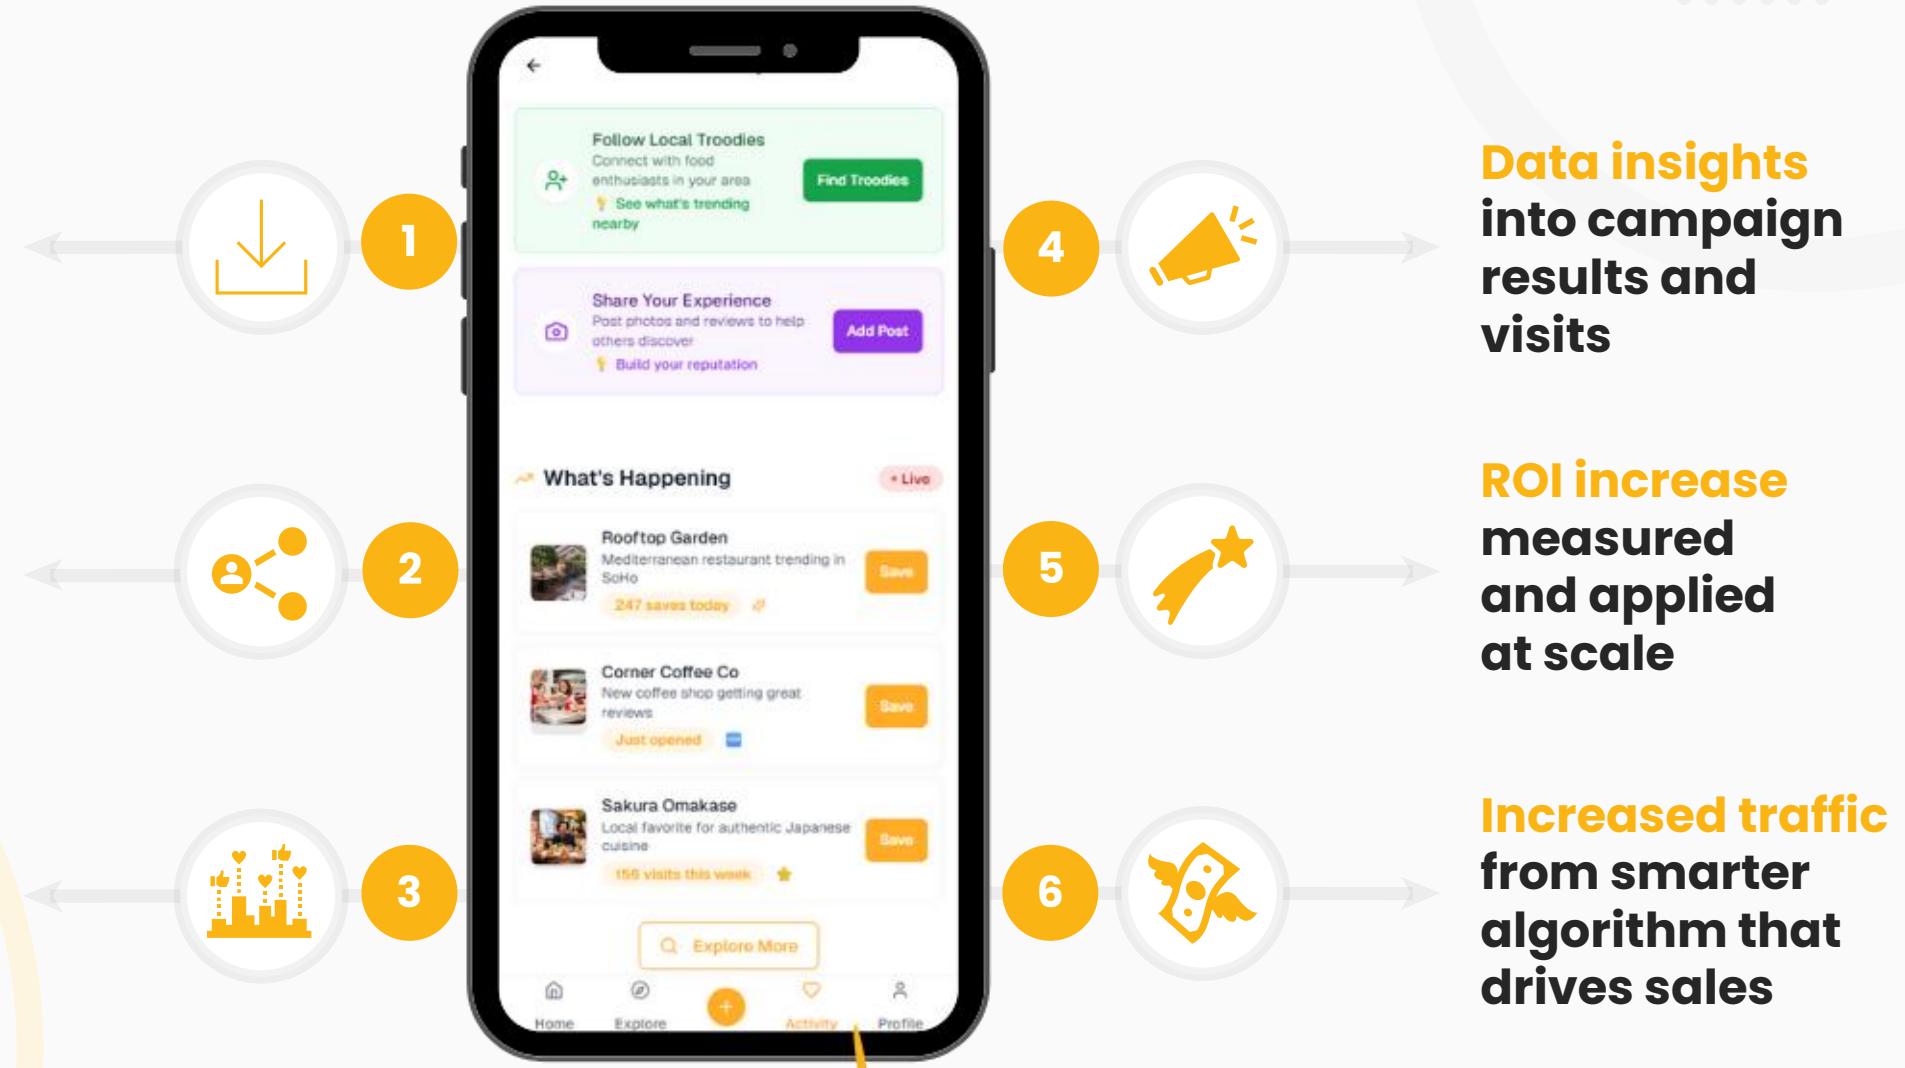

# AI powered personalization and attribution

**First-party data  
powers the  
algorithm**

**Sales tracked  
through unique  
live campaigns**

**Data flywheel from  
saves, clicks,  
spend, and visits**

The more users engage, the smarter the platform becomes → creating better matches, stronger ROI, and scalable growth for restaurants and creators

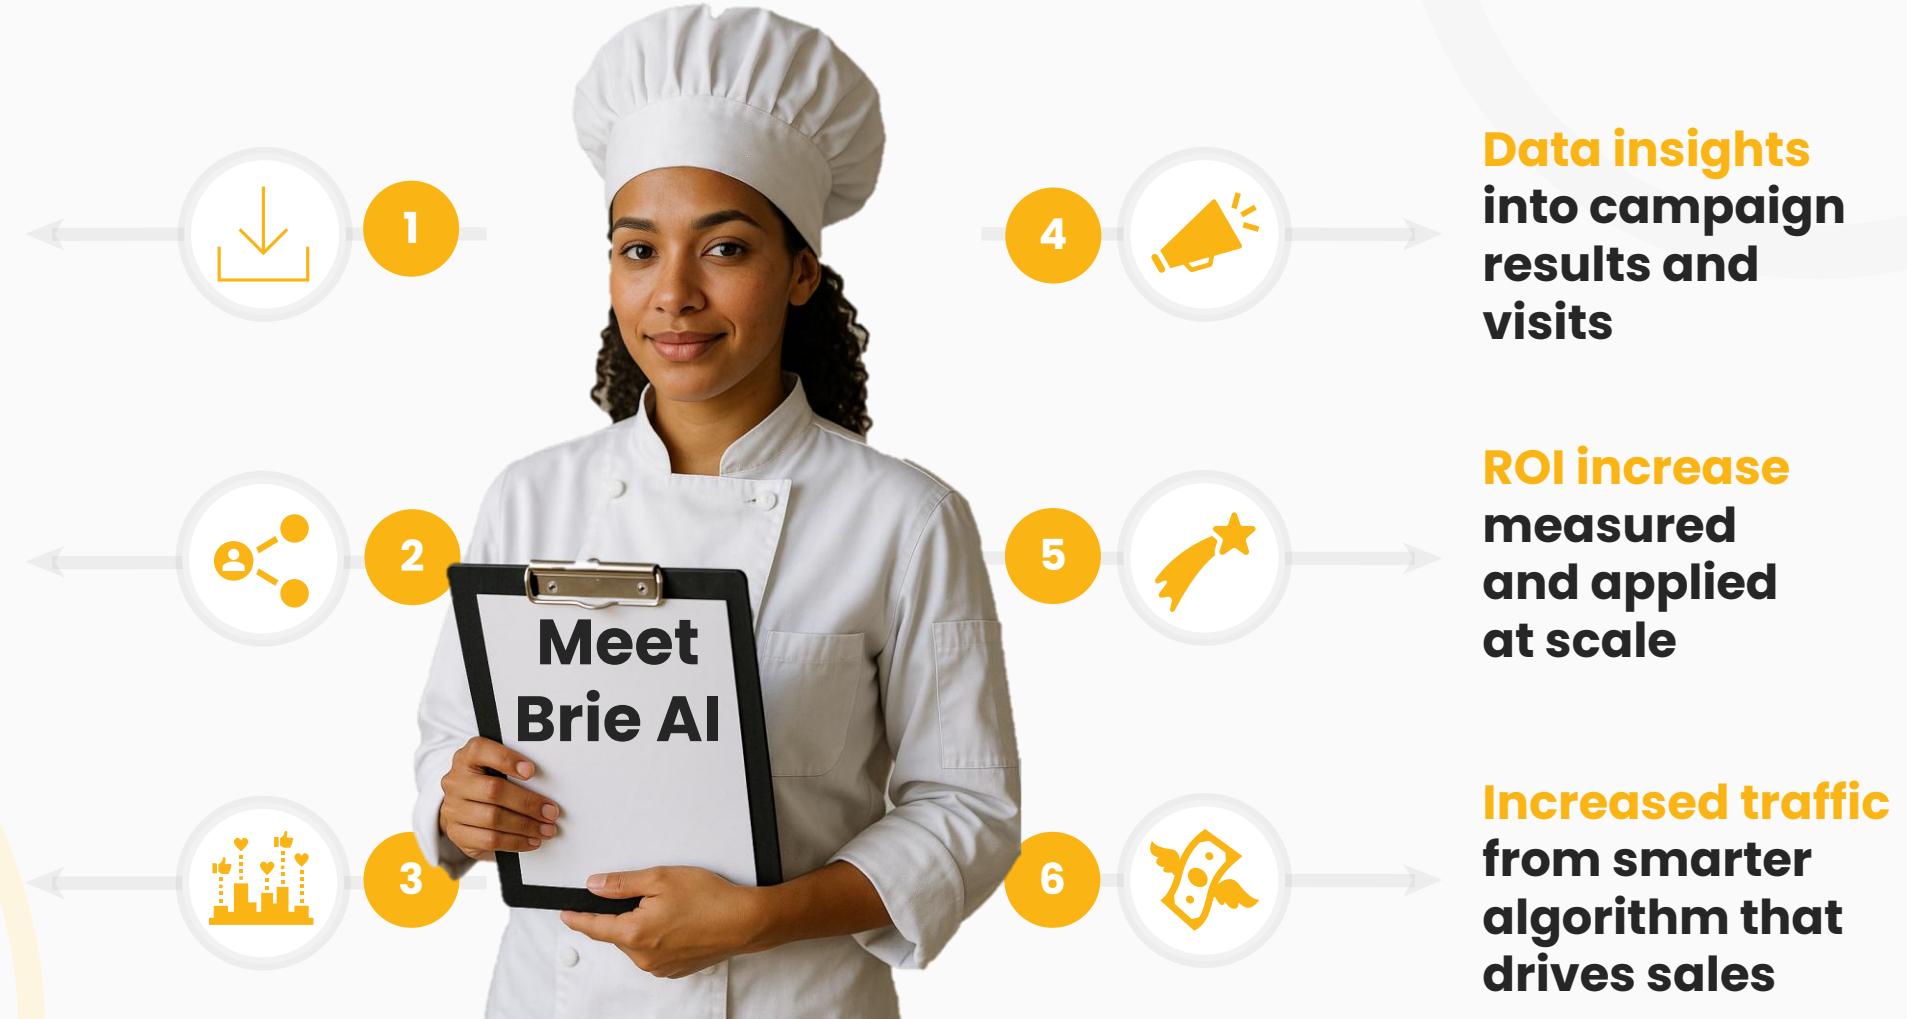

# AI powered personalization and attribution

# How we win – our recipe to scale

1

## Differentiated Go-to-Market Strategy

- Scaling fast with mass onboarding via city-level & org partnerships
- User acquisition model focused on in-person marketing and social media

2

## Building our data moat

- **First-party data advantage:** collects direct consumer behavior data – giving us unique insights no other review or social platform can offer
- **AI-powered personalization engine:** defensible flywheel of proprietary data that improves discovery, deepens user trust, and increases the value of our analytics

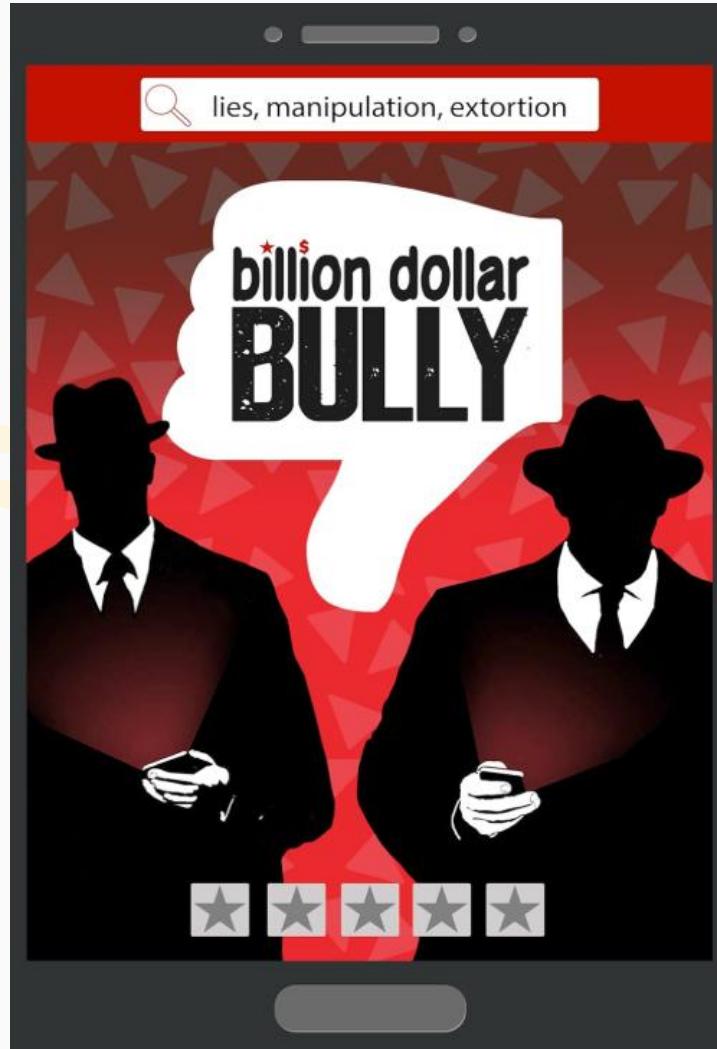

3

## **Yelp ≠ Personal. Mustard ≠ Sales-Based. Instagram ≠ Actionable.**

- Hyper-personalization through food & travel personas that tailor each user's experience
- Turning influence into measurable sales outcomes

# Yelp might be the default, but it's broken

- ✗ Ads-driven directory
- ✗ Conflicting reviews from strangers
- ✗ No ROI tracking
- ✗ Forces pay to rank
- ✗ Web-heavy, dated UI

- ✓ Community-powered social commerce platform
- ✓ Recs from people you trust
- ✓ Actionable insights + sales ROI tracking
- ✓ Allows for earned visibility
- ✓ Mobile, modern, community-based
